UnioGate

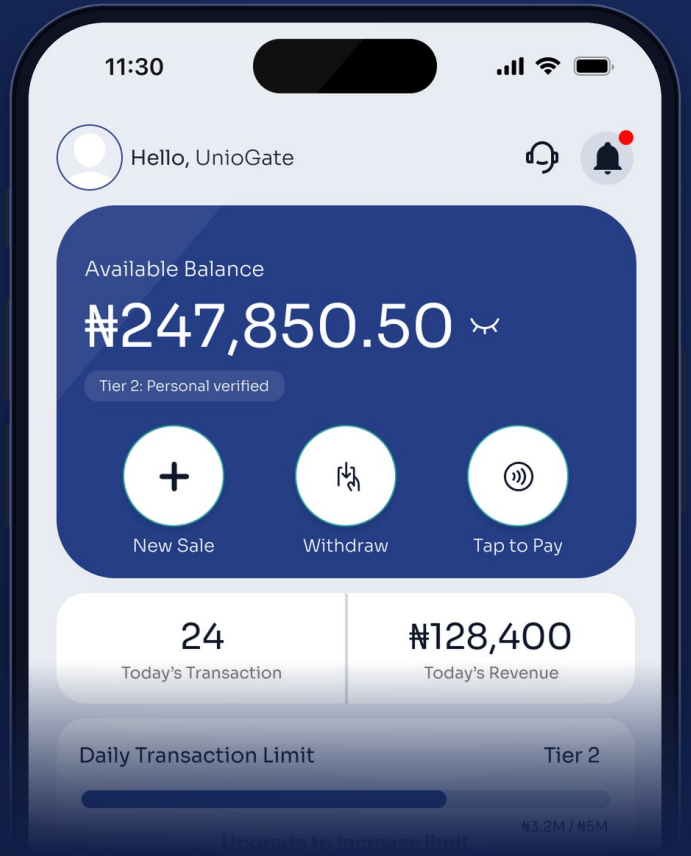

PRE-SEED PITCH DECK

The stablecoin app for merchants

Accept stablecoin and fiat on one terminal.

Raising $150K+ pre-seed

uniogate.com

THE SHIFT

Stablecoins are going mainstream

Stablecoin apps for individuals have exploded. Nigeria, a global leader in adoption, moves billions of dollars in stablecoin transactions.

APPS DRIVING ADOPTION

- UGLYCASH
- Chipper Cash
- YellowCard
- MiniPay
- Luno

and more

> *"I have USDT in my wallet, but I still need to convert it to Naira just to buy groceries."*

> **Favour Nelson**
> Freelancer

THE PROBLEM

Merchants are locked out

CUSTOMERS ARE READY

$22B

in stablecoin transactions in Nigeria in 12 months

59%

of Nigerian crypto users hold USDT

Nigeria has 39.6M MSMEs. Almost none accept stablecoin at the counter.

WHY MERCHANTS CAN'T ACCEPT IT

1. **Manual conversion**
   Crypto is sold into naira by hand, sale by sale.
2. **Fees and rate risk**
   Each conversion costs money and exposes the merchant to price swings.
3. **Counterparty risk**
   Cashing out means trusting strangers in P2P markets.
4. **No POS support**
   Terminals and checkout tools do not take stablecoin.

THE SOLUTION

One terminal for crypto and fiat

UnioGate is a unified crypto and fiat POS terminal for merchants and SME vendors.

We handle conversion and settlement behind the scenes.

- **Crypto and fiat in one terminal**
- **No crypto knowledge needed**
- **No conversion to worry about**
- **Instant cash settlement**
- **Multiple roles on one business account**
- **Multiple blockchain networks**

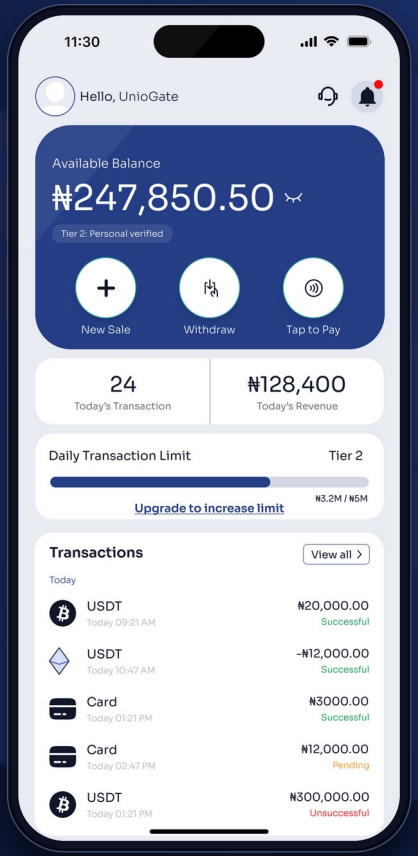

THE PRODUCT

Everything in one app

New Sale, Withdraw, Tap to Pay
Three core actions, one tap away.

Live revenue at a glance
Today's transactions and revenue, always up to date.

Tiered limits, built-in upgrade
Daily limits by verification tier, with in-app upgrade.

TRACTION

Merchants want this now

80+

merchant conversations

100+

stablecoin holders spoken to

72%

conversion rate

Committed through our waitlist form

Merchants who said yes signed up on our waitlist form, so the commitment is on record.

WHO WE WANT FIRST

Businesses whose customers already hold stablecoins

- Gadget Stores
- Jewelers
- Workstations
- Car Merchants
- Fashion Stores

Source: UnioGate merchant and stablecoin-holder interviews and waitlist form.

THE MARKET

A $343M opportunity

TAM
$343M

All Nigerian retail
A 2% fee on about $17B of retail sales across 39.6M MSMEs

SAM
$7M

Tech-forward vendors
500K+ vendors in Lagos, Abuja and Port Harcourt

SOM
$100K+

Our first customers
2,000 vendors, just 0.4% of SAM vendors

Every competitor targets individuals. None targets the merchant counter.

UnioGate

Sources: NBS/SMEDAN National MSME Survey (2020 data); Euromonitor retail estimate (about $19B in 2025, so a $17B base is conservative). SAM and SOM are UnioGate estimates.

COMPETITION

The competitive landscape

WHO	WHAT THEY DO	STABLECOIN POS AT THE COUNTER
UnioGate	Unified crypto + fiat POS terminal for in-store merchants	**Yes, one terminal**
Moniepoint	Agent banking, POS and business banking	Not offered*
Paycrest	Stablecoin-to-fiat settlement for businesses (B2B)	Not offered*
Opay	Wallet, transfers and merchant payments	Not offered*
BMONI	Consumer wallets and cards with stablecoin features	Not offered*
Palmpay	Wallet, transfers and merchant payments	Not offered*

*Based on public information as of October 2026. Sources: company websites and press coverage (TechCabal, Techpoint, The Condia).

HOW WE MAKE MONEY

Business model

TODAY

1-2%

Transaction fee on every crypto and fiat sale. Until we are licensed, this is our only revenue.

AFTER OUR CBN AND SEC LICENSES

Settlement spread
A margin on instant settlement

Premium features
Multi-location, analytics, reporting

Hardware sales
Our custom POS terminal in Phase 2

We intend to obtain CBN and SEC licenses to operate independently.

LICENSING

Why we need our license

TODAY'S LIMITS

Limited control over merchant fees
Our partners' pricing limits how we set fees.

Limited control over the ₦ to $ rate
Conversion depends on our partners' rates.

Limited access to financial tools
We can only use what our partners offer us.

WITH A LICENSE

We build our own API keys

We operate as independent financial infrastructure

It unlocks our path to profitability

Sources: Investments and Securities Act 2025 (SEC registration of digital asset and virtual asset service providers); CBN payment licensing framework.

PARTNERS

Partners and why we use them

Customer pays in stablecoin › Nomba receives it › Bach settles in naira › Merchant gets naira

Nomba

STABLECOIN RECEIPT

Receives the customer's stablecoin payment, so merchants never handle crypto.

Bach

NAIRA SETTLEMENT

Settles merchants in naira, the currency they actually spend.

Telpo

POS HARDWARE

Supplies the terminals that run UnioGate at the counter.

ROADMAP

Our path forward

PHASE 1 | NEXT 3-6 MONTHS

Mobile

- Launch iOS and Android
- Beta with 15 merchants
- Validate unit economics
- Build payment rails

PHASE 2 | AFTER PHASE 1

Hardware

- Custom POS terminal
- Tap-to-pay integration
- Scale to 500 merchants
- Full retail support

LICENSING TRACK

CBN and SEC

- Obtain CBN license
- Obtain SEC license
- Operate independently
- Launch our own API keys

SCALING

Where we go next

NIGERIA

THEN AFRICA

MERCHANT MILESTONES

Months 1-3
First 100 merchants

Months 4-6
500 merchants and the profitability threshold

Month 7
2,000+ merchants

Source: Chainalysis, 2025 Geography of Cryptocurrency Report (Ghana and Kenya rank in Sub-Saharan Africa's top five by crypto transaction volume).

TEAM

Meet the founder

Chidile Ozoemena

Founder & CEO. Leads product, partnerships and engineering.

Saw the gap from the inside. At UGLYCASH, a US stablecoin app with heavy Nigerian usage, I watched users hold dollars they couldn't spend in a shop. UnioGate builds that missing merchant side.

Technical founder. Computer science graduate (UNN), with engineering experience on Ethereum, Base, Stellar and Sui. I built the MVP with our founding engineers, so pre-seed money goes to launch, not outsourcing.

Groundwork first. I interviewed 80+ Lagos merchants before building. They care about settlement speed and spread first, and stablecoins second.

Stablecoin infrastructure. Developer relations and documentation for IFA Labs, a multi-chain stablecoin oracle network.

TEAM

Why we're the best team to build this...

Daniel Nwachukwu

Chief Technical Officer (CTO)

Founding engineer and technical lead

Okeke Chinedu

Software developer

Founding engineer and technical lead

Chigozie Allwell

Graphic designer

Design and branding lead

Onyedikachi

UI/UX designer

Design and branding lead

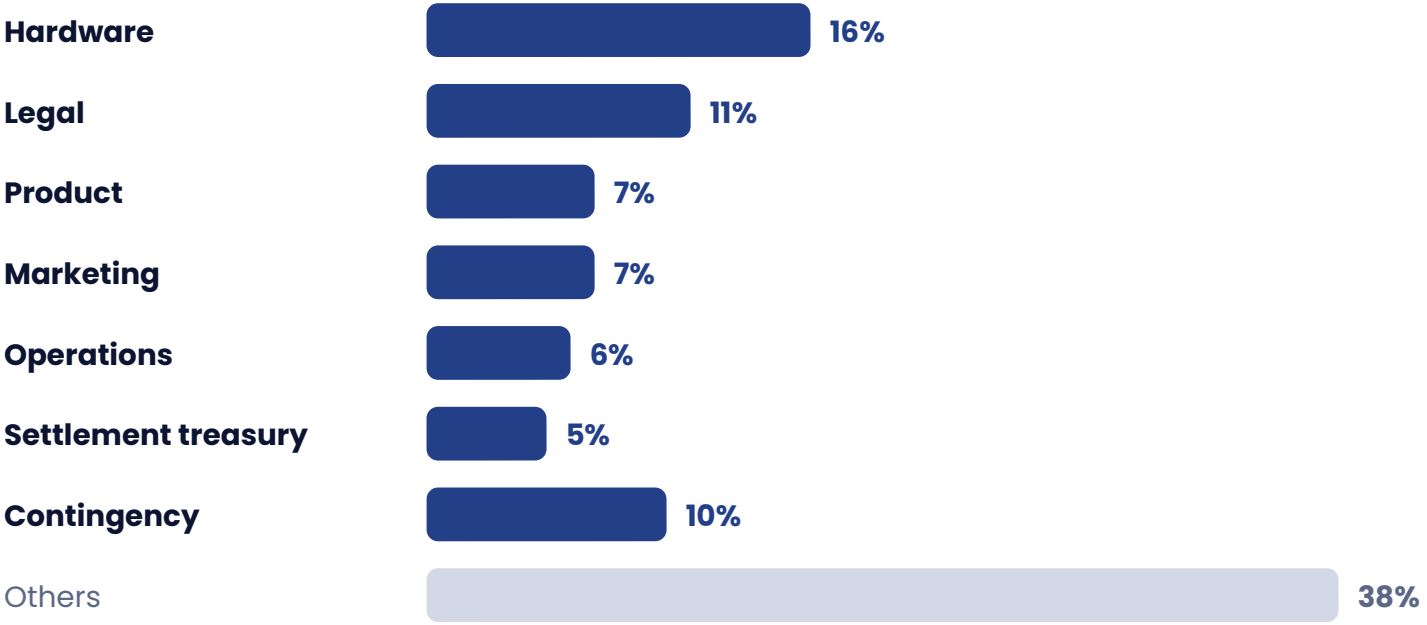

Shipping together since UNN
We met at the University of Nigeria, Nsukka, and won hackathons as a team. UnioGate is the product of years building together, not a team assembled for a pitch.

Committed before funding
Daniel and Chinedu built the MVP before any money came in. They share in a 10% team equity pool.

Next hire
A compliance and risk lead, with this round.

USE OF FUNDS

Where the money goes

UnioGate

Share of the pre-seed round by category.

THE ASK

Help us go live

$150K+

We have the MVP and a waitlist of committed merchants. We need runway to go live and prove unit economics.

Infrastructure

Deployment, security audit, payment rails

Team runway

12-16 months of operations salary

Regulatory

CBN licensing support and compliance

Liquidity

Settlement and reserve infrastructure

UnioGate

Thank you

We're building the future of stablecoins.
