UnioGate

PITCH DECK

THE STABLECOIN APP FOR MERCHNATS

BY CHIDILE OZOEMENA

THE SHIFT IS HAPPENING...

Over the past few years, we've seen an explosion in stablecoin apps built for individuals. Apps like UGLYCASH (where I interned), Chipper Cash, YellowCard, MiniPay, Luno, and more are currently driving adoption.

And Nigeria, being the global leading country in stablecoin adoption, doing billions of dollars in stablecoin transactions, became a target market for many stablecoin applications.

THE PROBLEM

> ***“I have USDT in my wallet, but I still need to convert it to Naira just to buy groceries.”***
>
> ***— Favour Nelson (Freelancer)***

- 41M SMEs in Nigeria. None can accept stablecoin directly.
- Merchants hold customer crypto, manually convert to Naira.
- Every transaction: friction, fees, and counterparty risk.
- Tech-forward vendors today are blocked from crypto payments.

ALL THESE JUST BECAUSE THE MERCHANT DON’T ACCEPT CRYPTO...

MARKET VALIDATION

80+
Merchants Conversations

58
Said “YES” Immediately

72%
Conversion Rate

Merchants understand the problem, they want this and they're ready to use it...

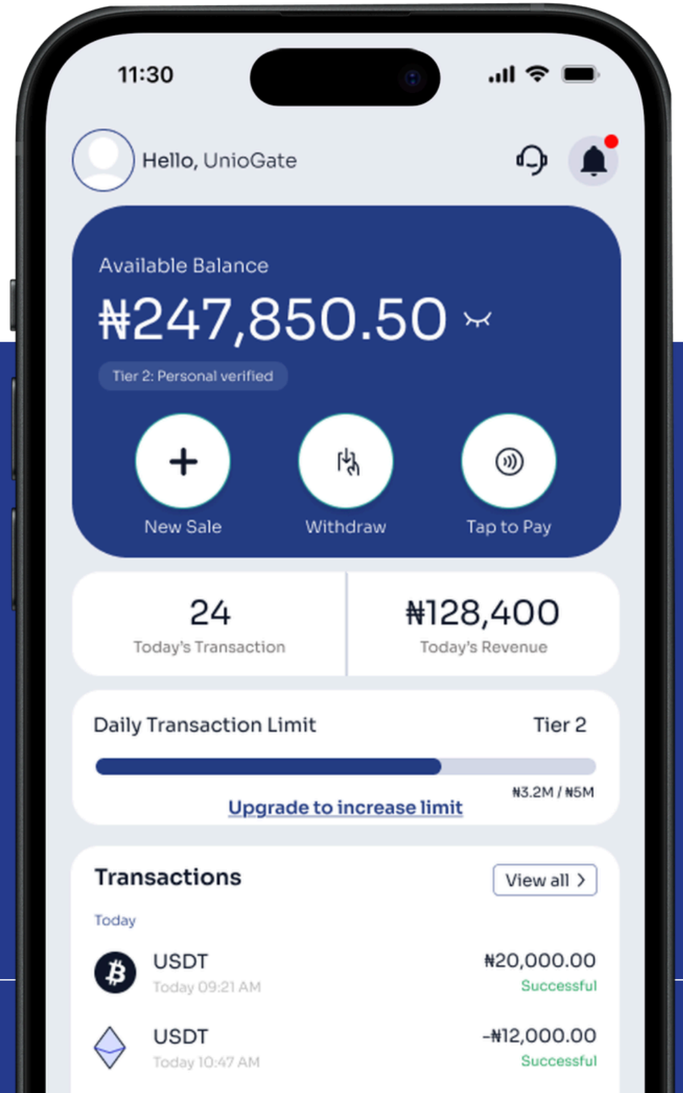

THE SOLUTION

UnioGate

The Stablecoin App for Merchants

UnioGate is a unified crypto and fiat POS terminal that allows merchants and SME vendors to seamlessly accept stablecoin and fiat in one place, without having to worry about conversion or settlement.

WE HANDLE THE TOUGH PART BEHIND THE SCENES

uniogate.com

OUR PATH FORWARD

Phase 1: Mobile

Next 3-6 months

- Launch iOS and Andriod
- Beta with 15 merchants
- Validate unit economics
- Build payment rails

Phase 2: Hardware

After Phase 1

- Custom POS Terminal
- Tap-to-Pay integration
- Scale to 500 merchants
- Full retail support

UnioGate

CHIDILE OZOEMENA

BEHIND THE SCENES...

Hi,
I am **Chidile**, a software developer, technical founder, and project manager...and I am building **UnioGate.**
I decided to build this solution while working as an Intern at UGLYCASH - an American stablecoin app.
And I've got the best teammates building this with me

MARKET OPPORTUNITY

There's not a single competitor offering what we are building - everyone is focused on individuals, not merchants.

TAM: 41M SMEs in Nigeria, $17B Annual retail market, 2% of GMV = $343M opportunity

SAM: 500K+ tech-forward retail vendors (Lagos, Abuja, PH), Early crypto adopters + fiat processors, $7M annual revenue opportunity

SOM: 2,000 vendors (0.4% of SAM), $100K+ annual revenue, 12% market penetration in target segment

WHAT WE NEED

We have the MVP,
We have 58 merchants ready.
We need operational runway to go live and prove unit economics...

- Infrastructure and compliance: App deployment, security audit, payment rails
- Team runway: 3-6 months of operations salary
- Regulatory: CBN licensing support and compliance
- Liquidity management: Settlement and reserve infrastructure

BUSINESS MODEL

Revenue streams:

- Transaction fees: 1-2% per transaction (Crypto + Fiat)
- Settlement spread: Margin on instant settlement
- Premium features: Multi-location management, analytics, reporting
- Hardware sales: Phase 2

Path to profitability:

- Month 1-3: Acquire first 100 merchants, prove repeat usage
- Month 4-6: Hit profitability threshold at 500 merchants
- Month 7: Scale to 2000+ merchants and expand geographically

SERVICE OVERVIEW

UnioGate is the future of the Stablecoin industry, closing the gap to create a seamless flow for stablecoin holders.

- One unified terminal for **Crypto** and **Fiat**
- No crypto **knowledge** needed
- No need to worry about **conversion**
- Fast cash **settlement**
- **Instant** withdrawal
- Multiple **role** for one business account
- Multiple **blockchain** networks

THANK YOU

We're building the future of stablecoins
